

# THE BENEFITS OF **SIP TRUNKING**

SIP trunks have proven to be more robust and cost effective than traditional ISDN. And because SIP Trunking is an IP Based telephony service, you also benefit from number flexibility, which brings with it a host of added benefits that can solve various business issues. Here are just a few of the ways that a SIP solution from Charterhouse Voice & Data can enhance the productivity of your organisation.

#### FLEXIBILITY

Numbers are **managed** in the cloud and are not fixed to a geographical location.

L OL 16. O100101. O100110C 110101110001L 00100101000 0100100101000 1010100100100 011010100110 011010100110

This allows you to keep your numbers if you move office without any call forwarding or stationery costs, and it can be used to create a local or

national presence for your customers.

#### RATIONALISATION

For businesses with multiple sites, SIP Trunking provides the option to rationalise ISDN lines and reduce the number of PBX's required.

#### COST SAVINGS

SIP Trunking costs significantly less than tradtitional ISDN and analogue services. We offer inclusive calls to UK landlines (01,02,03) as well as free calls to your own extensions and offices, including international locations.

SIP Trunking

**ISDN** 

### BUSINESS CONTINUITY

Relocate your office temporarily in an emergency quickly and cost effectively, whilst maintaining full control over call routing.

## RESILIENCE

VOICE & DATA CONVERGENCE

SIP Trunking from Charterhouse Voice & Data can be delivered over Ethernet to provide a high quality voice and data solution running over one connection, helping you maximize ROI and achieve additional cost savings.

Plus, we have a range of connectivity options that are delivered over our dedicated network. .01000. 1001010101. 10011001101 10101110001' 11001015 SIP Trunking allows you to load balance calls between sites at busy times and re-route calls in a disaster without call forwarding costs. It's a service that can provide 100% uptime, so you can deliver the service your users and customers demand.
